*Capital Market Products includes stocks, public funds, NSS and bonds held by individuals.

**Other Domestic Investment includes trusts, fund accounts, brokerage management, private securities fund products, gold, private equity, etc. held by individuals.

China's Middle Class & Available Financial Products

- ◆ Financial products available to Middle Class remain limited and skewed towards short-term savings products.

| Category | | Risk Profile | Yields | Liquidity |
|--|--|-----------------|-----------------|-----------------------------------|
| Fixed-income | Term Deposits | Low | Low | ranging from months to years |
| | Bank WM products | Low | Low | mainly 3-6 months |
| | Income certificates | Low | Low | mainly 1 year |
| | Fixed-income trust products, ABS | Relatively low | Relatively low | mainly 1-3 years |
| | Savings-typed insurance | Low | Low | mainly 3-5 years |
| Structured Products | Income-strengthened institutional products | Medium | Medium | mainly within one year |
| | Leveraged structured products | High | High | mainly within one year |
| Publicly-raised Funds | MMF | Low | Low | Daily redeemable |
| | publicly issued bonds | Relatively low | Relatively low | Daily redeemable on specific time |
| | Stock-focused funds and alternative funds | Relatively high | Relatively high | |
| Securities-Backed Privately-raised Funds | Privately-raised bonds | Relatively low | Relatively low | Monthly/quarterly redemption |
| | Quantitative private fund & QPF FOF | Medium | Medium | Monthly/quarterly redemption |
| | Long-only private equity fund & Event-driven private equity fund | Relatively high | Relatively high | Monthly/quarterly redemption |
| Private Equity | Mezzanine fund | Relatively high | Relatively high | Minimum 2 years |
| | Start-up fund, Growth fund and M&A fund | High | High | Minimum 5 years |
| Overseas Products | Offshore funds, QDL & QDIE | Non-specific | Non-specific | Non-specific |
| | QDII | Non-specific | Non-specific | Mainly short-to-medium term |

Fanhua - Puyi Household Wealth Survey

About the Survey

The survey will be co-published by FANHUA, PUYI Standard, a leading independent research firm focusing on statistics analysis and research in China's financial service sectors and PUYI Inc. (Nasdaq: PUYI), a leading independent wealth management service provider in China.

- The data covers populations in 214 cities across 30 provinces and municipalities in China.
- Based on the size of investable financial assets, the respondents were divided into middle-class households (CNY 100,000 to 600,000), affluent households (CNY 600,000 to 6,000,000), and high-net-worth households (over CNY 6,000,000).
- The survey analyzes the sources of income, distribution channel, asset allocation methods, as well as the current status and challenges of wealth inheritance for different classes of households.

Background of the Respondents

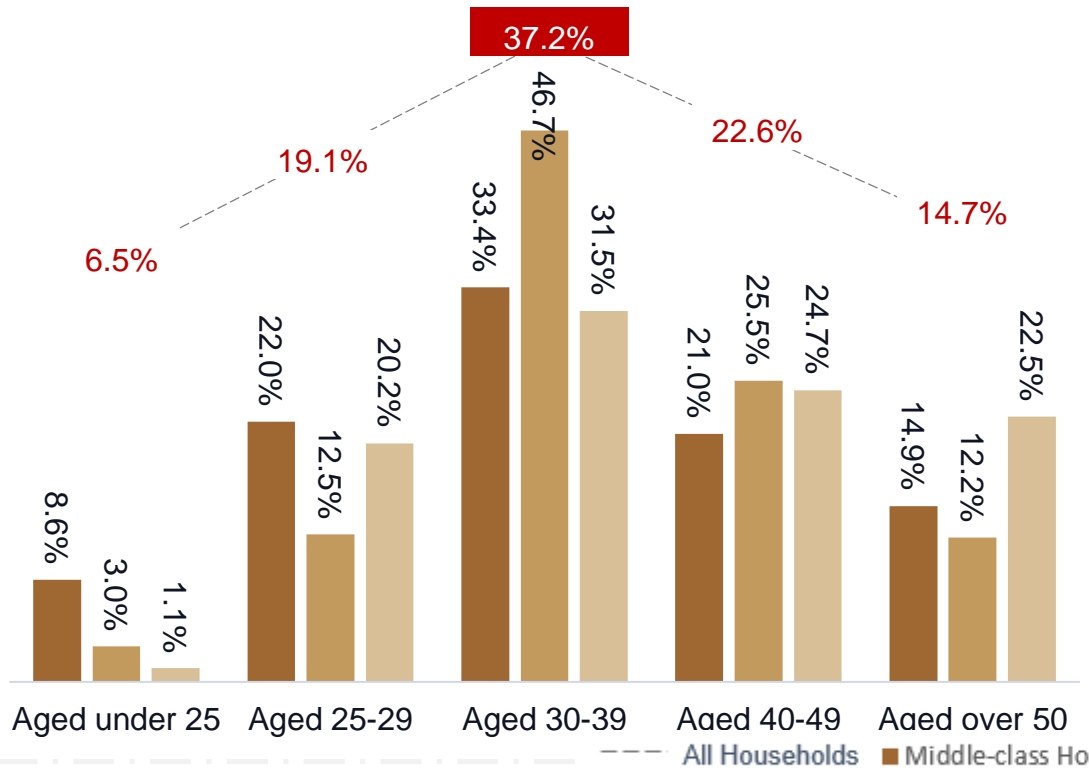

—Age Group and Geographic Distribution

Age group of middle class and above households:

- 31.5% - 46.7% in the 30-39 age group;
- 21.0% to 25.5% in the 40-49 age group;
- High-net-worth families having the highest presence (22.5%) in the 50 and above age group

Geographic distribution of middle class and above households

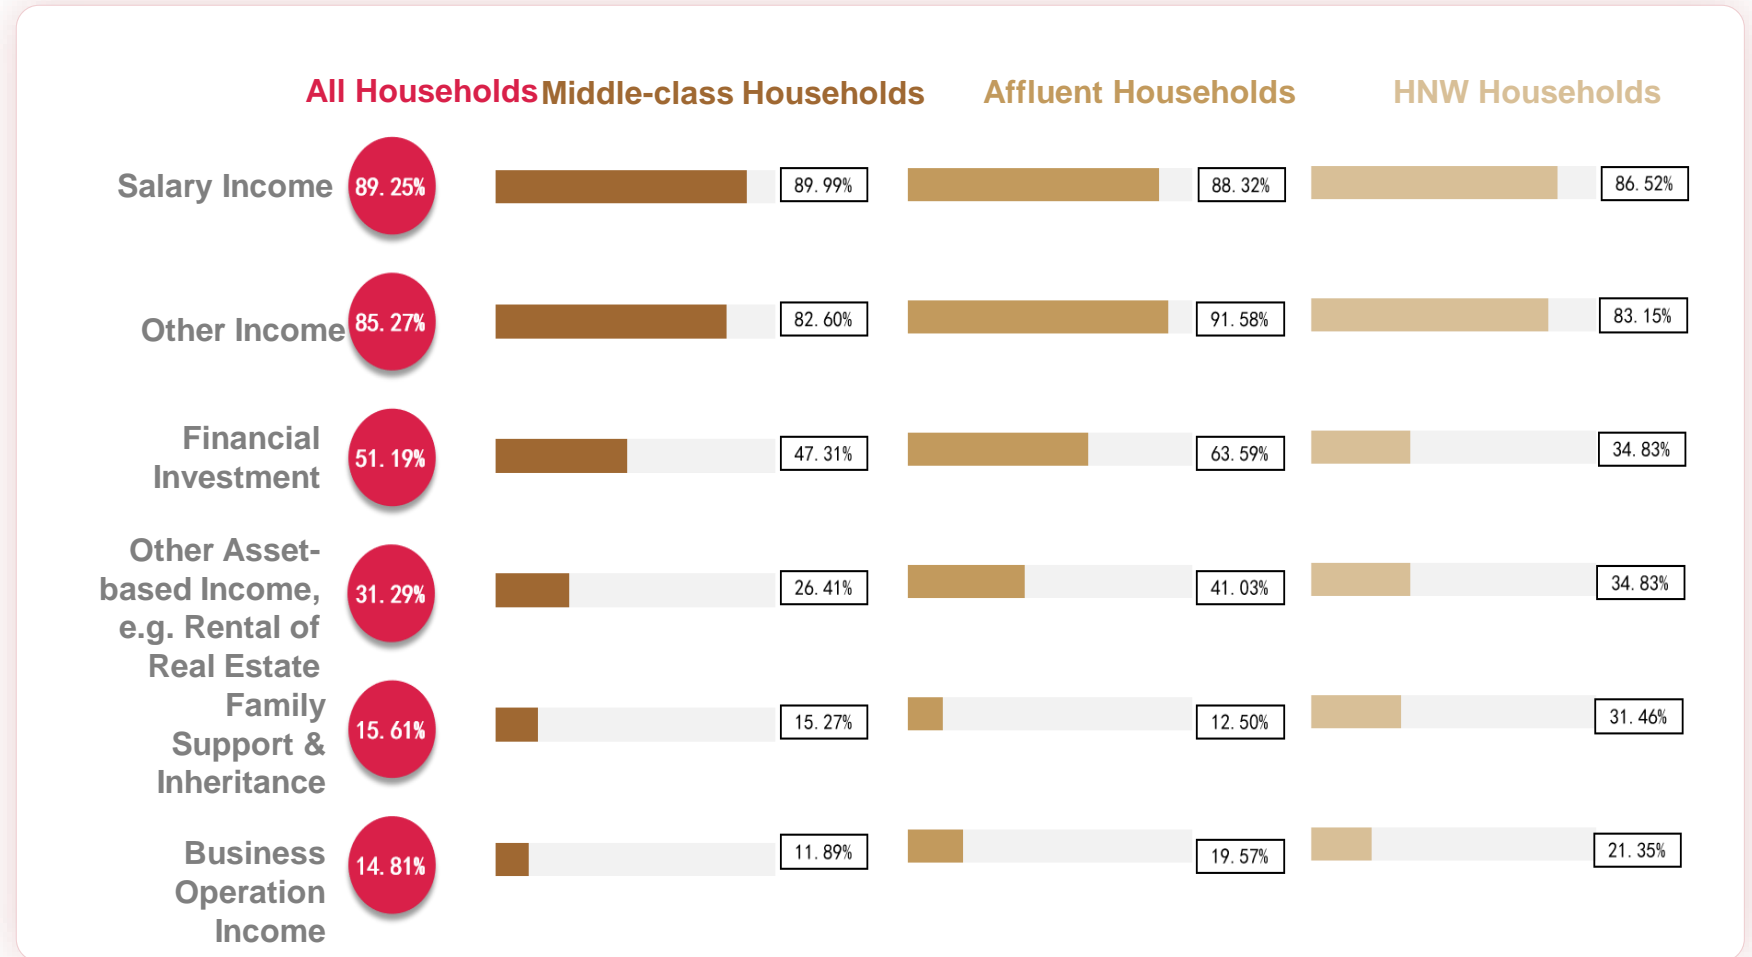

- Middle-class and affluent households predominantly situated in the East China region, with distribution percentages of 29.29% and 36.96%, respectively.
- High-net-worth households notably concentrated in the South China region, representing 24.72%, followed by the North China and East China regions.

Sources of Family Income

Main sources of income for middle class and above households:

- Salary Income
-- 86% ~ 90%
- Financial Investment
-- 34% ~ 64%
- Other Asset-based Income
-- 26% ~ 42%

Family Income Statement

Family Annual Income

Middle-class families:

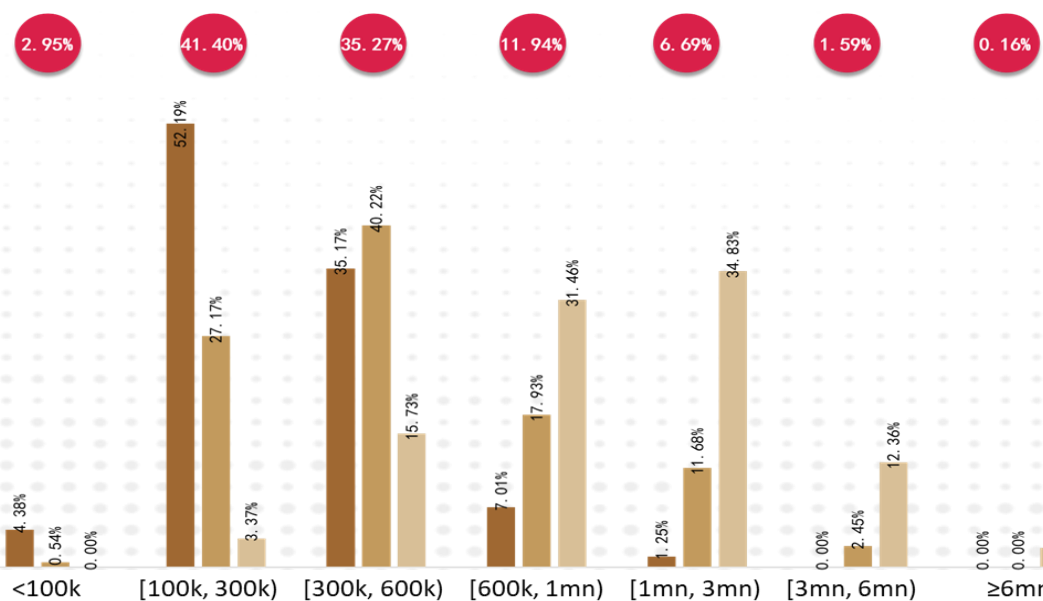

- Highest proportion in the income range of RMB100k-300k at 52.19%.

Affluent families

- Highest percentage in the income range of RMB300k-600K at 40.22%.

High-net-worth families

- Relatively higher proportions in the income ranges of RMB600k-RMB1 mn and RMB1 mn-3 mn, at 31.46% and 34.83%, respectively.

● All Households ■ Middle-class Households ■ Affluent Households ■ HNW Households

Family Annual Expenditure

Middle-Class Families:

- Highest proportion in the range of RMB100k-300k at 56.32%

Affluent Families:

- Highest proportion in the range of RMB100k-300k at 49.73%

High-Net-Worth Families:

- Highest proportion in the range of RMB600k – RMB1 mn at 35.96%

Key Pressure Points

- The biggest pressure points for middle class and above families are child education with 23.1% to 38% expressing concerns, followed by elderly care, debt burden and health care.
- Middle-class families face significantly higher economic pressure compared to affluent and high-net-worth families.

SOURCE OF FINANCIAL PRESSURE

Expectations of the Next 5 years

- All households expecting greater increase in income relative to expenditure
- High-net-worth families are more optimistic about their future income relative to expenditure

● All Households ■ Middle-class Households ■ Affluent Households ■ HNW Households

What is Wrong with Current Distribution Models?

- Banks continue to dominate offline sales channels
- Distribution channels fragmented, quantity over quality
- Lack of universally accepted professional qualifications such as CFP & AFP

| Product Type | Distribution Channels |
|---|--|
| Banking WM Products | Banks |
| Trust Products | Trust companies, banks, insurance companies, insurance asset management companies, securities brokers and fund companies |
| MMF | Banks, fund companies, securities brokers, independent financial advisors (securities investment advisory firms and independent fund distribution agencies), internet channels |
| Publicly-raised funds | Banks, fund companies, securities brokers, independent financial advisors (securities investment advisory firms and independent fund distribution agencies), internet channels |
| Privately-raised funds | Banks, fund companies, securities brokers, independent financial advisors (securities investment advisory firms and independent fund distribution agencies) |
| Asset Management Plans | Banks, fund companies, securities brokers, independent financial advisors (securities investment advisory firms and independent fund distribution agencies) |
| Insurance Asset Management Plans | Trust companies, banks, insurance companies, insurance asset management companies, securities brokers, and fund companies |
| Savings-typed Insurance Products | Banks, insurance companies, independent insurance brokers and internet channels |

Lack of Professional Advice Leads to...

- Mis-selling
- Making the Wrong Investment Decisions
- Bad Customer Experience and Regulatory Complaints

Faced with Loss on Investment

Faced with Gain on Investment

I often choose to sell

I often choose not to sell

- What We at Fanhua are Doing?

What could Change and Where are the Opportunities?

- Removal of implicit guarantee of return for WM products and declining yields of bank WM products present opportunities for independent financial service providers to gain market share
- Western style Independent Financial Advisor model almost non-existent due to strict regulation on cross selling
- Life insurance agents, particularly independent agents, have the best chance to transform in to IFAs but professionalism is key
- Insurance industry growth over past 30 years largely driven by 'mass agent' model which has reached the end
- We estimate the industry has less than 1m professional advisors, but the market needs at least 3mn

DECLINING YIELDS OF BANKING WEALTH MANAGEMENT PRODUCTS

MASS AGENT MODEL PHASING OUT

Retirement Needs and Considerations

Deficits in Pensions

Growing retirement concerns

Key considerations for future financial assets allocation:

- Retirement Plans
- Inheritance

Need more professional financial sales channels

Deficits in Pensions for Different Families

Retirement Concerns for Different Families

● All Households ■ Middle-class Households ■ Affluent Households ■ HNW Households

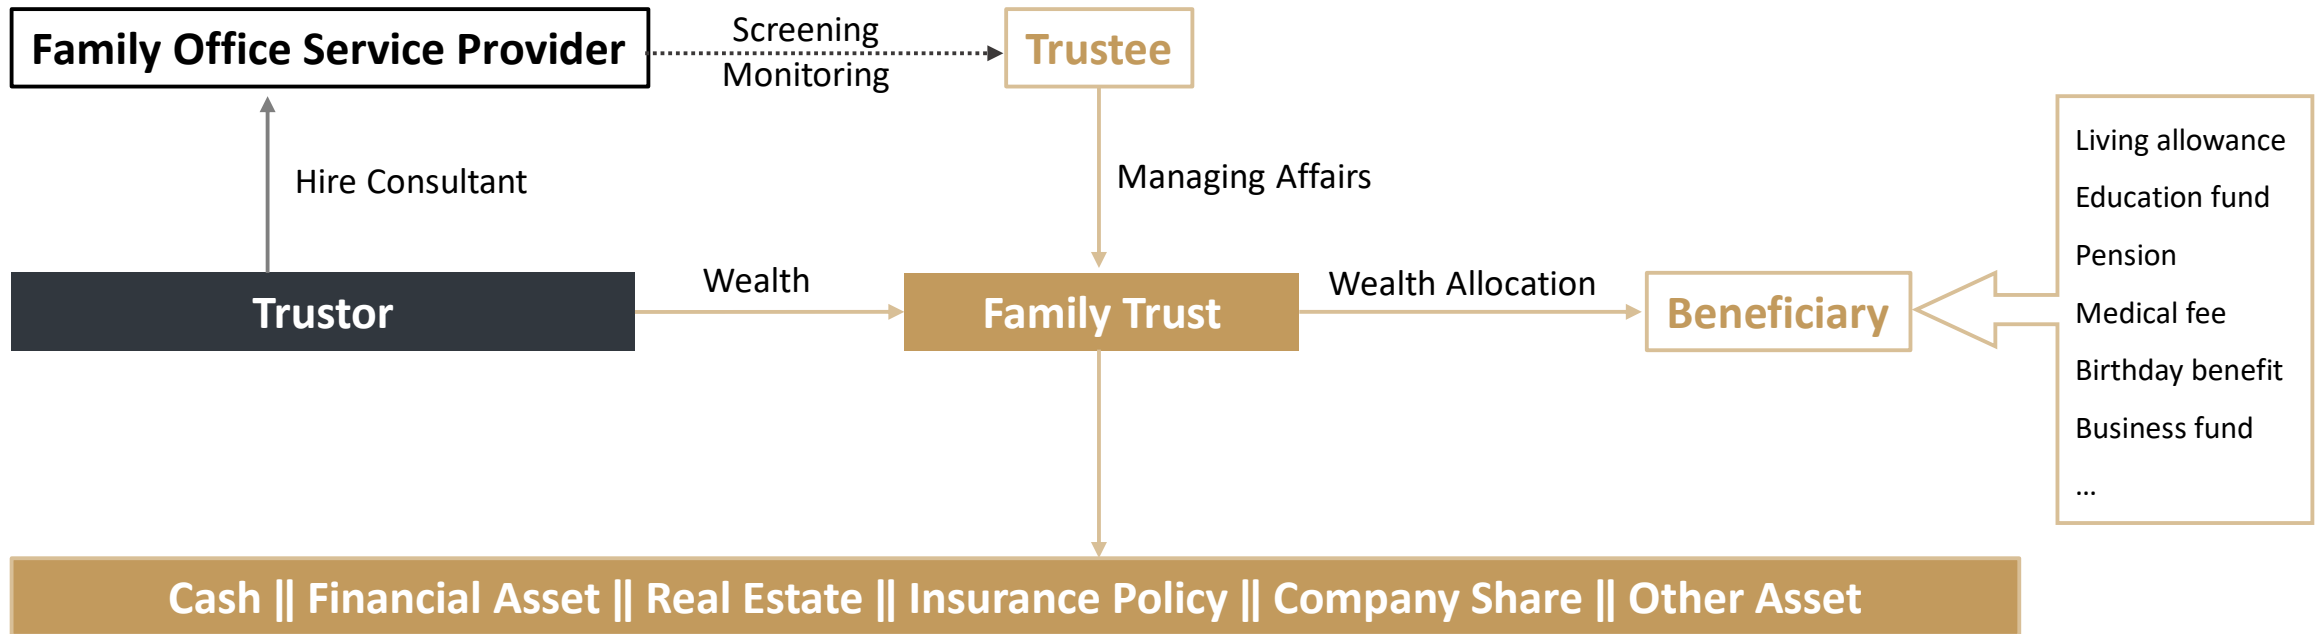

Inheritance Considerations

- High-net-worth families place greater emphasis on wealth inheritance, with the highest proportion of selecting a score of 5 (very important) for inheritance, at 38.20%
- Middle-class families have the relatively higher proportion of selecting a score of 1 (extremely not important), at 3.38%.

What Are We Doing to Drive Quality Growth?

Fanhua's Vision: To Build a Technology-Driven Financial Service Platform

Revamping the Traditional Model

Professionalization

- Captive advisors getting more "specialized, professional and elite", transforming from solely product advisors towards financial and wealth mgmt. advisors

Digitalization

- Developing various digital tools to enable advisors to enhance their productivity and service capability

Integration

- Leveraging comprehensive financial advantages to develop diversified insurance products and expand service offerings of "insurance+"

Dual Growth Engines

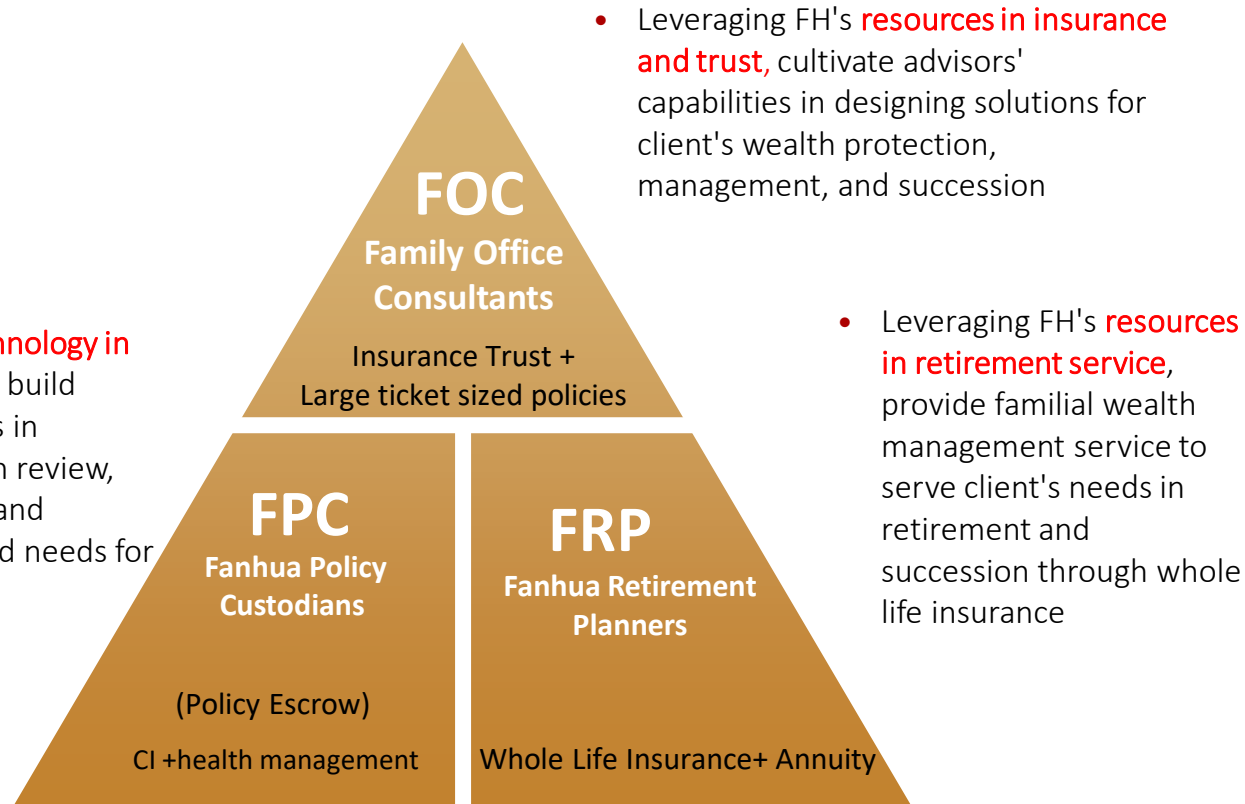

Building an Open Platform

- Develop an open platform to enable various types of insurance brokerages, sales organizations and individual agents:
 - **Lower IT and compliance costs** through a unified compliance structure and IT infrastructure
 - Providing **diversified product offerings**
 - Enabling agents' **digital transformation**
 - Offering professional training support, **assisting advisors in productivity and professionalism improvement**
 - Providing cash flow support and capitalization paths to **enhance liquidity**

This is How We Are Using AI...

Chinese Version

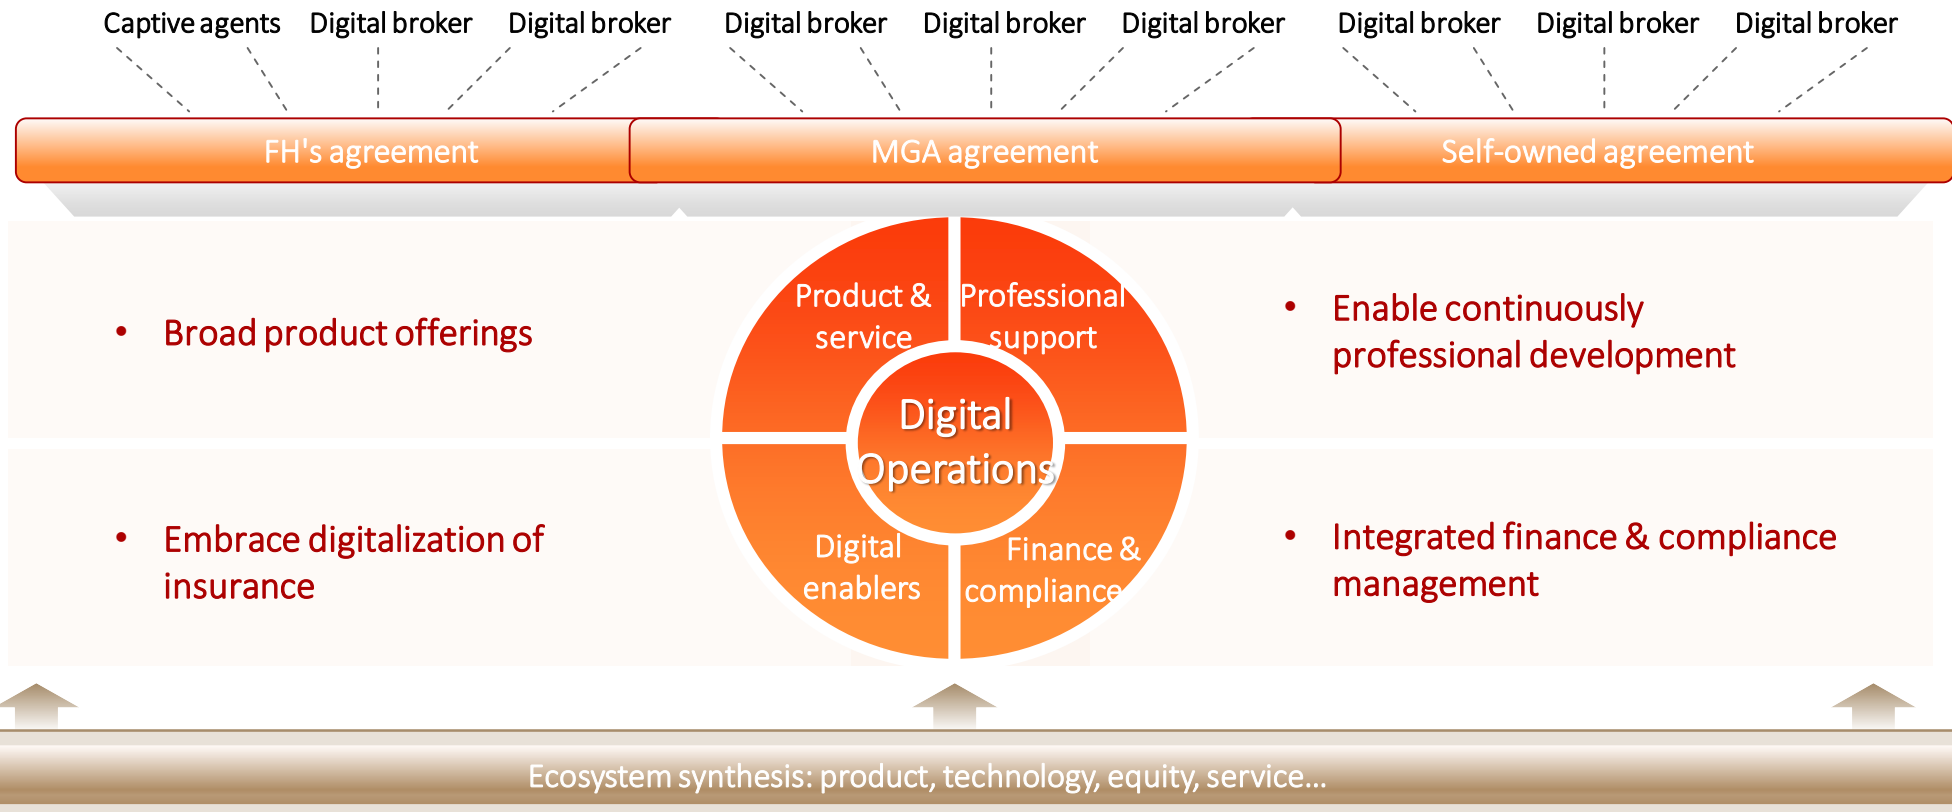

English Version

What Are We Doing to Drive Quality Growth?

An Open Platform to Empower Independent Insurance Brokers and Advisors

- With our open platform, we seek to empower platform users by:
 - Sharing a **unified compliance structure and IT infrastructure** to drive efficiency and lower IT and compliance costs
 - Sharing **deep and broad relationship with life insurers** to provide the best exposure for all
 - Enabling agents' **digital transformation**
 - Sharing 25 years of accumulated experience and knowhow to **empower professional development**
 - Providing cash flow support and capitalization paths to **enhance liquidity and security**

Encouraging Results - Significant Improvement in Advisor Quality

Growing Contribution from Open Platform Strategy

*Organic FYP refers to FYP contributed by our existing agencies excluding short term premiums generated by Baowang

**Open Platform FYP refers to FYP contributed by three newly acquired entities and third party entities using our platform

Significant Growth Potential for Independent Advisors in China

Brokers/agencies taking up substantial market share in developed markets

Premium Mix By Distribution Channel, 2020

Expected continued rapid growth of independent insurance intermediaries in China, with market share rising from 4% to 12%

Premium Mix by Distribution Channel, 2020-2030E, China

Rapid growth driven by strong demand and supply

Demand Side

- **Increasingly sophisticated customers**
 - Accumulation of private wealth
 - Rising insurance penetration
 - More complex and diversified insurance needs
 - Awareness to seek professional 3rd party advice
 - Calling for cost-effective solutions
- **Small and medium insurers' increasing reliance on brokerage**
 - Homogenous product offerings, limited resources and weak sales capabilities leading to increasing reliance on independent intermediary channel

Supply Side

- **Expanding talent pool:**
 - Highly productive agents and professionals from FIs or other industries seek diverse career development opportunities, independent business models and higher compensation

Huge Market Potential Overseas

Opportunity for Expansion in to Hong Kong and South East Asia Markets

Growth Opportunities + Replicable Platform Model

- Hong Kong's insurance market reaching **HKD600B by GWP**, making it one of the most important insurance markets in Asia-Pacific. **with amiable size and huge potential**
- Enormous potential in life insurance in Southeast Asian market, with markets like Singapore having sales models similar to China.
- Market share shifting from direct to independent insurance intermediary channel, driven by technological development, tightening regulation, and consumers' demand for more choices
